EDUCATION

Certificate in Geographic Information Systems (American River College Sacramento CA)

BSc –Geology (University of Dar es Salaam, Tanzania)

WORK EXPERIENCE

Quality Control Inspector (Flex) 6/22-

- Utilized microscopes, gauges, and templates to visually inspect medical equipment assemblies and sub-assemblies per established specifications.
- Ensured start-ups, in-process and shutdown operation processes were performed on the product being inspected.
- Notified appropriate personnel of identified product/process issues.
- Performed acceptable quality limit (AQL) and provided timely feedback on non-conforming products if identified.
- Entered all quality data into manual and electronic forms.

Business to Business (B2B) Content Writer (Freelance) 6/20-

- Research, outline and create B2B content (case studies, blog posts)
- Maintain an independent blog on Medium.com
- Wrote blog posts on GIS technology and the Oil and Gas Industry
- Created outlines for instructional Technical Documentation

GIS Supervisor (JML Design Inc.) 7/17-6/20

- Acted as GIS point of contact for the company
- Provided technical instructions and implementation of clients' workflows and standards
- Proposed new business development areas to the upper management and helped expand the GIS group from 2 to 7 employees

Sheet Metal Foreman (McCorvey Sheet Metal) 2/15-6/17

- Coordinate duct deliveries to meet project schedule
- Check deliveries for accuracy and completeness
- Update as-builts
- Completed daily/weekly planning/delivery paperwork

Data Validation Specialist (Spectra) 8/13-12/14

- Reviewed pipeline construction documents, (both new and historical), and identified applicable ones for scanning and indexing
- Correlated technical documents (As-built, Bill of Materials, Hydrostatic tests) against baseline database.
- Documented results and updated records per the established work process

GIS MAOP Consultant (Williams) 4/12-7/13

- Conducted qualitative and quantitative assessments supporting pipeline MAOP
- Reviewed historical data to ensure the accuracy of data in the GIS database
- Used historic data as well as Inline Inspection (ILI) data to update both graphics and attributes in the GIS database

Material Verification Specialist (G2 Partners/EI Paso) 6/11-4/12

- Conducted a comprehensive review of historical documentation to identify and correct core data deficiencies associated with pipeline and facility records.
- Conducted research to resolve unknown information for pipe and fittings within the company database to enable the calculation of MAOP. Data sources used included historical and current alignment sheets as well as as-built drawings.

GIS Analyst-Land (Talisman) 6/10- 6/11

- Used Tobin Data Tool to help landmen search and locate competitive lease information.
- Worked with the land department to ensure the accuracy of assets in the GIS database
- Assisted in updating and creating parcel boundaries.
